Continuous development
Stable and direct relations
with partners

Customer's satisfaction

Latest technologies

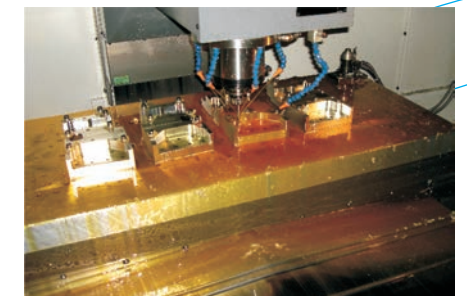

Innovative solutions

Working as a vendor with
world leading OEM's

Guarantee of top quality

Qualified staff

Care of the environment

1975 We had started our family business by the name of Auto Machine Tools & Parts Industries. An enterprise manufacturing special purpose machines for auto industry, foundaries, confectionery units and other Industrial units.

1982 In 1982 our company became a (pvt) ltd company. Auto Machine Tools & Parts Industries (pvt) ltd. It was a bigger and advanced setup for the manufacturing of special purpose machines. In 1983 we started making special purpose transfer machining lines (SPM) for manufacturing mass production of agriculture tractors, truck and cars parts. Our machines serving successfully in different auto sector, specially Millat Tractors Ltd. manufacturer of Messy Ferguson Tractors and AL Ghazi tractors Ltd. manufacturer of Fiat tractors in Pakistan.

1987 Power Wheels a sister concern company was established in 1987 for the manufacturing of Auto parts. Power Wheels started working as a vendor with different O.E.M's producing agricultural tractors, trucks and cars in Pakistan. Company also have some exports for USA, Turkey and Europe.

2000 In 2000 Power Wheels added another bigger unit with latest technology and equipment including sets of CNC machines for the machine shop and Carl Zeiss CMM for the Quality Control Department.

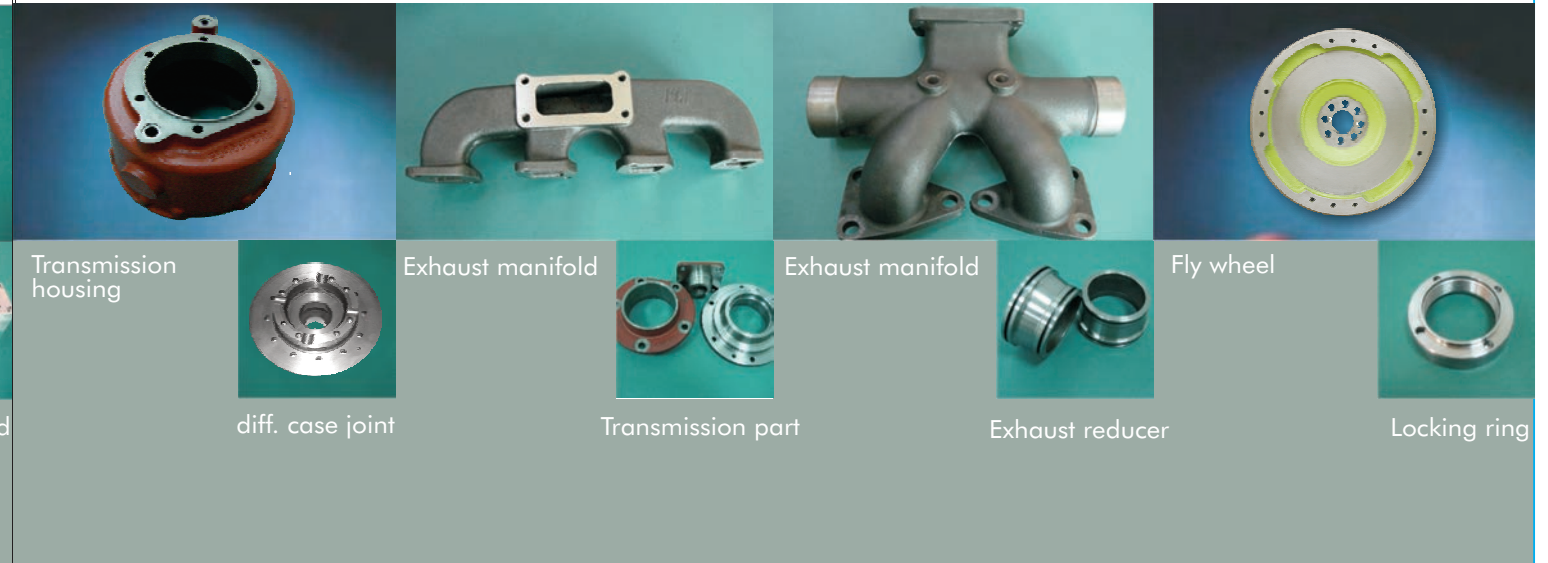

2020 In 2020 entered into a new field of business, started producing dies and moulds for different industries.

Power Wheels is producing gray and high tensile cast iron components, specially hydraulic pump parts for Massy Ferguson tractors. Company also specialize in high precision steel and aluminum machining and regular supplier of engine Fly wheels to the OEM's for the last 21 years.

component and product division

The Component and Product Division acting within the organizational structure of Power Wheel produces:

- hydraulic pump parts machining, fly wheels and other casting machining
- high precision aluminum and steel parts machining
- gray cast iron and high tensile casting
- foundry pattern equipment

hydraulic pump & Power Staring Cylinders

Hyd. pump front section Valve cahmber Piston Hydraulic Gear Pumps

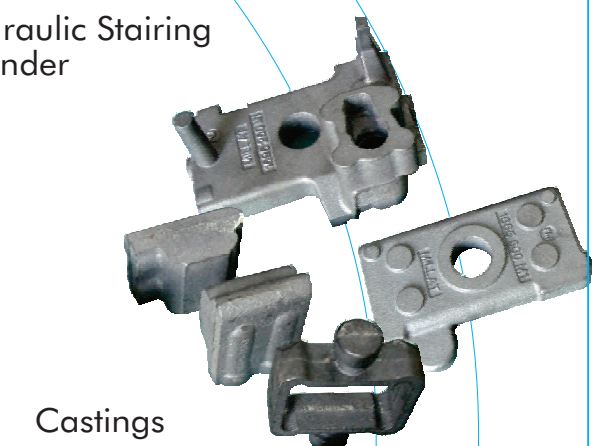

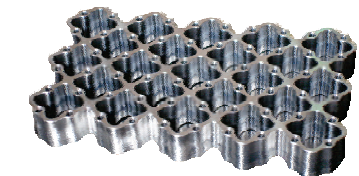

Castings are machined on:

- YCM supermax vertical machining center TV 146A
- YCM supermax vertical machining center MV 106A
- YCM supermax vertical machining center MV 66A
- Okuma Twin Palet Horizontal machining Center
- Daewoo Twin Palet Horizontal machining Centers
- YCM supermax horizontal turning center TC 15
- Summit vertical turning center VL 130R

Hydraulic Stairing Cylinder

Castings

Exports to USA, Europe & Turkey
